

Meeting Minutes

Meeting Date: September 10, 2004

Time: 9:00am

Location: Department of General Services Telecommunications Division

630 Sequoia Pacific Blvd. Sacramento

Conference Room 115B

Participants: Department of General Services Telecommunications Division (Kari McConnell, Pauline Tsumura); MCI (Mark Roese, Ken Burdine); SBC (Steve Szymanski)

Discussion Items:

- A. Single Point of Failure (SPF) Chico/Redding leased line solution:
 - ☐ MCI ordered the leased circuit on 9/7/04.
 - ☐ The line was leased from AT&T
 - ☐ The expected installation is mid-November.

- B. SPF Monterey to San Luis Obispo and Bakersfield to Los Angeles solutions:
 - ☐ A 3rd party leased line solution was selected for both locations
 - ☐ Form 20s are being submitted this week
 - ☐ Monterey to San Luis Obispo will be leased from AT&T
 - ☐ Bakersfield to Los Angeles will be leased from Sprint
 - ☐ The approximate installation period for both locations is mid-November.

- C. Non SPF issue:
 - ☐ A second OC3 will be installed between Sacramento and San Francisco. This backbone augmentation is a result of consistent high utilization on the current OC3 between Sacramento and San Francisco and additional customer bandwidth requirements.
 - ☐ Form 20 is being processed this week
 - ☐ Estimated installation date is mid-November

Next Steps:

- ☐ MCI and SBC will provide status for all SPF leased lines by COB September 24th. Actual install dates will be provided as the information becomes available
- ☐ The next status will be posted on the DGS/TD web site by COB September 27th.
